Parinaya Sarees - Documentation PDF Index

Exported 11 November 2026. 81 source documents, one PDF each, plus this index. Current shipping: distance delivery disabled by default; saved flat shipping active. Start with the current documentation index and Active flat shipping guide. Dated audit/design records remain historical.

Every Markdown file in docs/ and the project root is included. The font licence is included as relevant ownership documentation. Source code, environment files, patches, robots configuration, dependency/generated artifacts and the historical Firestore rules source dump are excluded. Links to exported documents target their sibling PDFs; other links retain the original reference.
